Company

EHS Technologies

Company Description

EHS Technologies (EHS) is headquartered in Moorestown, New Jersey. EHS is committed to growing their business and work force in support of DoD efforts and to that end has established its new office and facilities at Research Pavilion, White Plains, MD in order to be adjacent to the customer and their growing network of teaming partners.

EHS was founded in 1996 to provide high quality program management, IT, modeling and simulation, the design and production of technology-based systems, environmental, ordnance and energetic engineering, integrated logistics support, training, and communications-related products and services. These services included strategic planning and marketing materials, and environmental consulting services to include environmental compliance, audit and assessment programs to Government and commercial clients.

With over 100 personnel onsite at locations across the United States, EHS has positioned itself to provide responsive support to their customers. EHS's growth as an 8(a) company has been explosive not only in the amount of contracts awarded from all services within DoD but also in employee growth and industry penetration. Some of their customers include the General Services Administration, USAF, US Army, US Marine Corps, and the US Navy including SPAWAR, NSWC, and the Fleet Forces Command. EHS conducted \$20 million of business in fiscal year 2011.

Business Type

Woman Owned, 8(A) Small Business
